CERAMIC & CLAY TILE

Tile mortar eliminates guesswork for matching colors

FROM: [Boral Roofing](#)

[Request More Information](#)

Boral Roofing introduces Boral Tile Mortar, which had been offered in the Texas and Midwest markets for several years, to the Florida and East Coast markets. It is a one-step, fiber-reinforced mortar for tile-roof weather blocking—just add water and mix. With the color premixed into the mortar, there is no guessing the right oxide quantity to color match the tiles. The tile mortar also contains an integrated water repellent additive to help prevent efflorescence.
